

Formal Document

"Influx"

Ronit Chinda

1. Overview

1.1 Purpose

The purpose of this Software Requirements Specification (SRS) document is to outline the requirements for the development of "Influx," a web-based Over-The-Top (OTT) entertainment platform. Influx will offer users a rich catalogue of movies and TV shows, along with a personalised recommendation system.

1.2 Scope

Influx will provide a user-friendly interface for streaming entertainment content, including movies and TV shows. The application will prioritise user engagement through a personalised recommendation system based on individual viewing preferences.

1.3 Product Perspective

Influx will operate as an independent web application, interacting with users through standard web browsers. It will connect to a backend server for content management, user authentication, and recommendation generation.

1.4 Functional Requirements

- Content Catalogue.
- User Authentication.
- Personalised Recommendations.
- Search and Filter.
- User Profile.
- Subscription Management.

1.5 Non-functional Requirements

- Performance.
- Security.
- Reliability.
- Scalability.

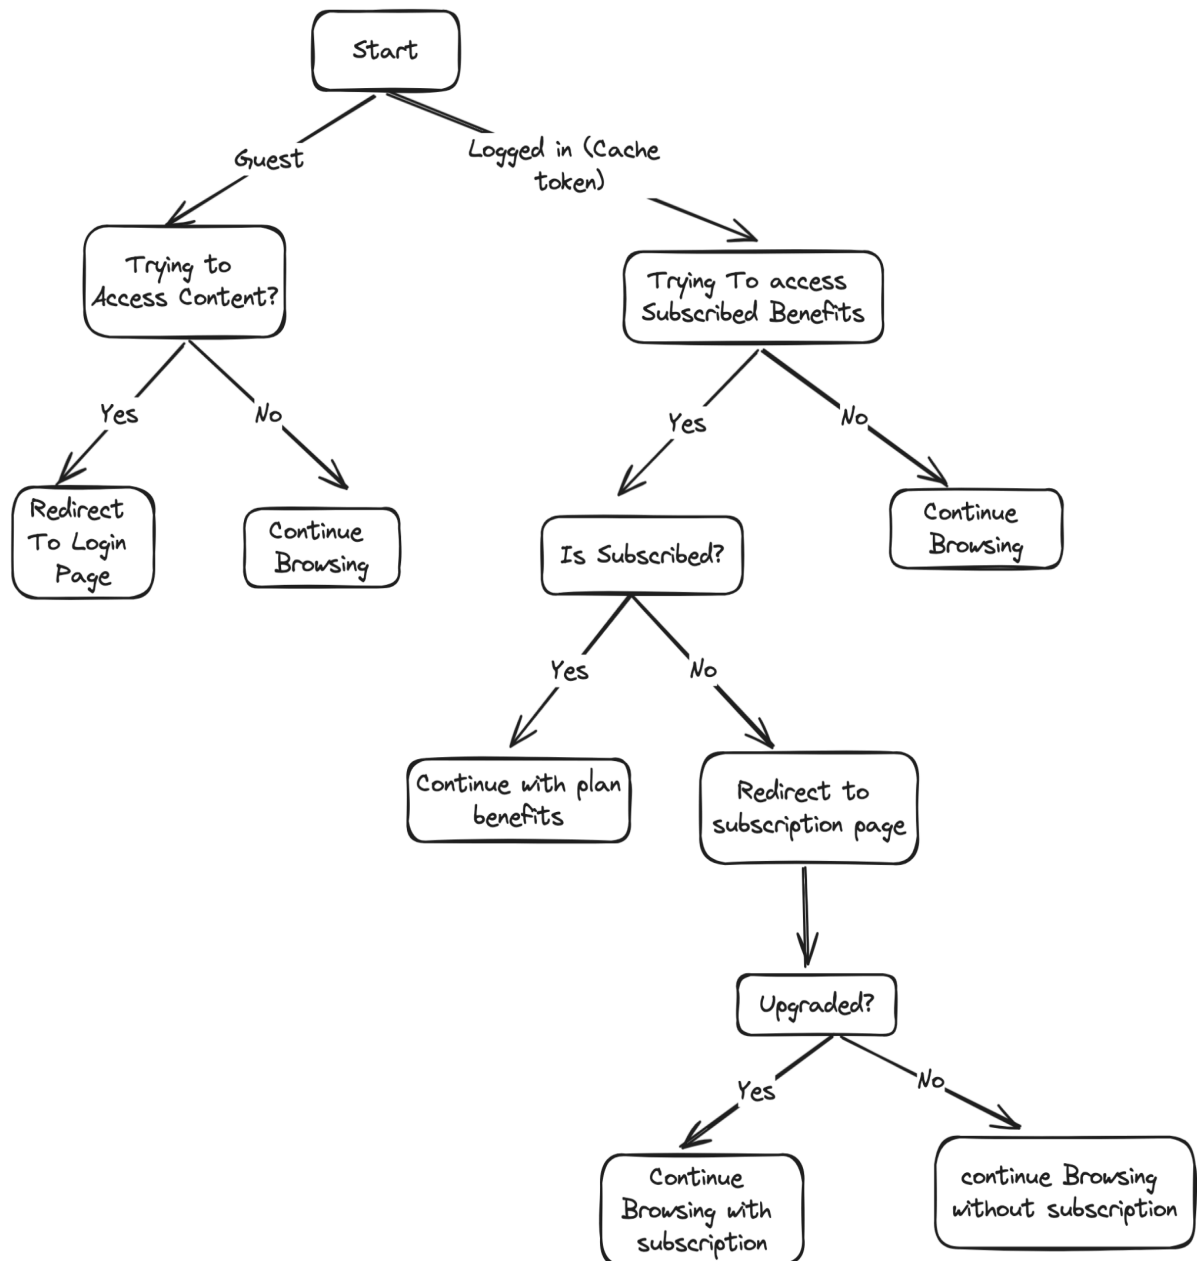

1.6 Other Constraints and External Interface Requirements

- User Interfaces.
- Hardware Interfaces.
- Software Interfaces.
- User Classes and Characteristics
 - ☐ **Guests:** Users without accounts, limited to browsing.
 - ☐ **Registered Users:** Account holders with access to personalised features.

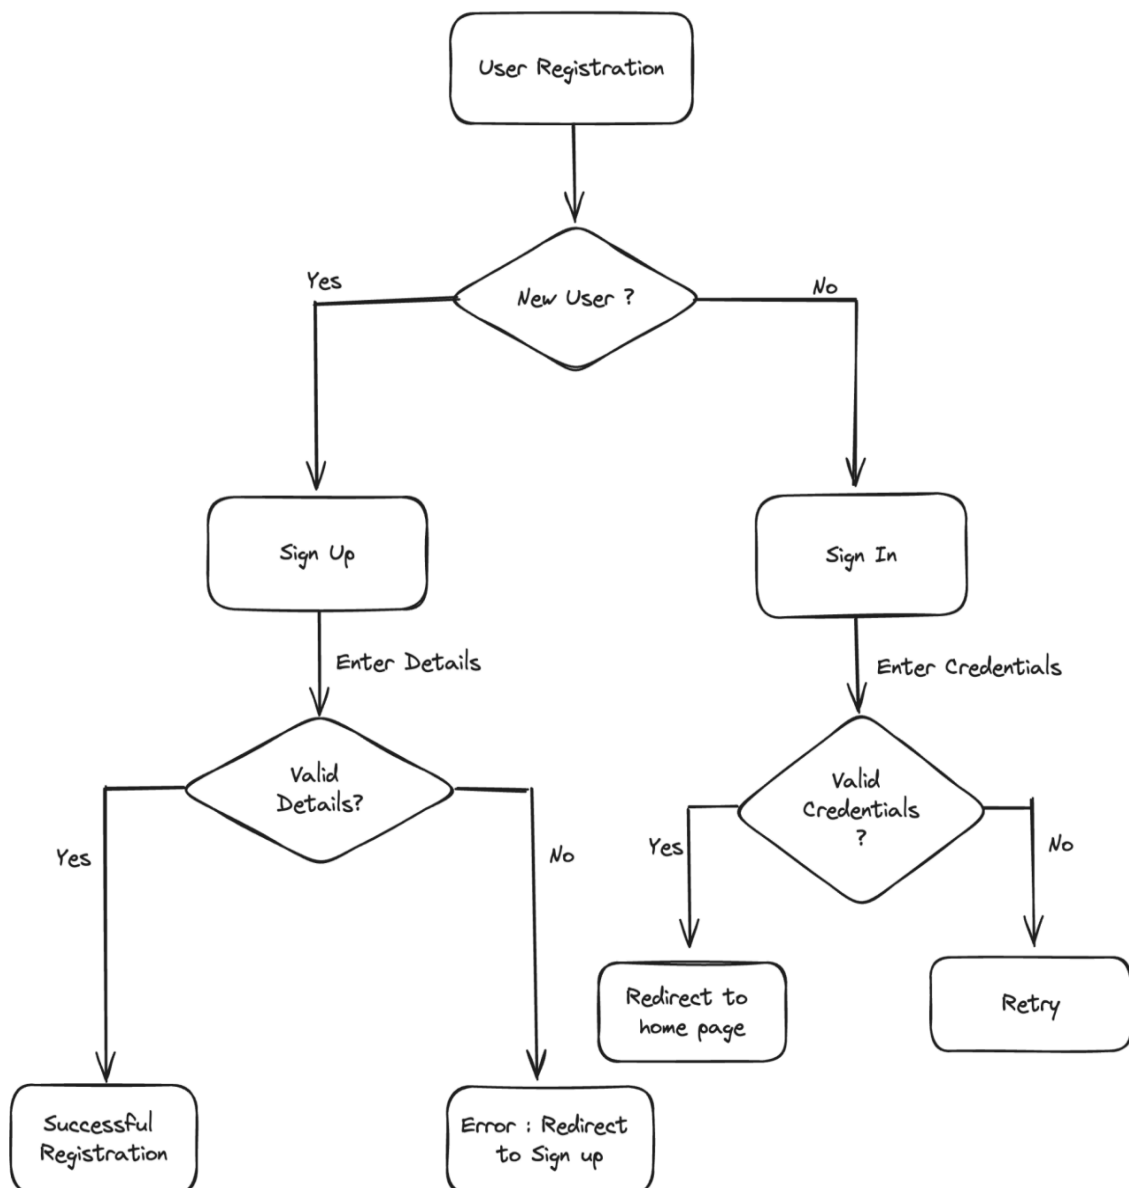

- Operating Environment.

2. Decision Tree

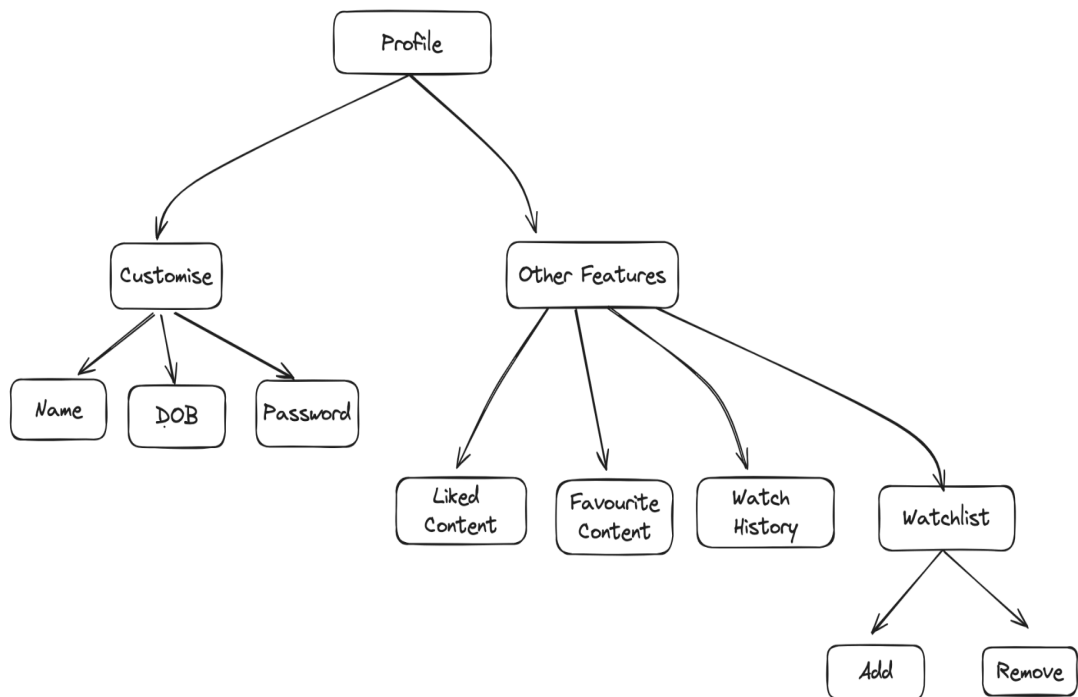

2.1 Access Controls

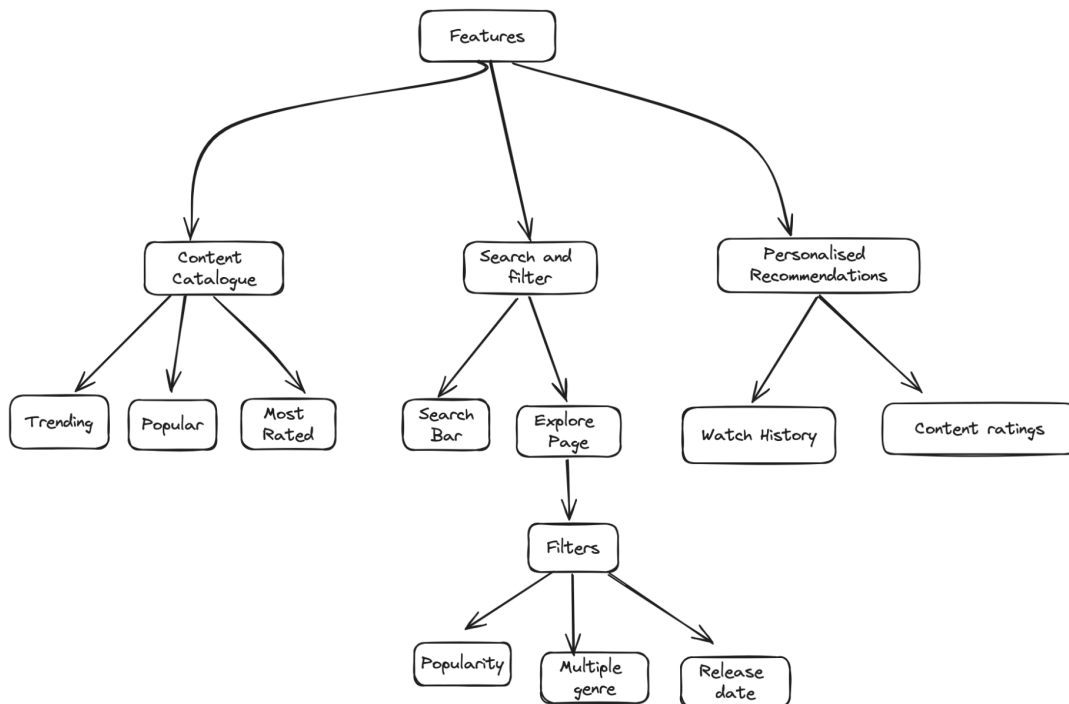

2.2 User Authentication

2.3 User Profile Management and Features

2.4 General Features

3. Decision Tables

3.1 Access Controls

Conditions					
Guest	Yes	Yes	<i>No</i>	<i>No</i>	<i>No</i>
Trying to Access Content	Yes	<i>No</i>	<i>Yes</i>	<i>Yes</i>	<i>Yes</i>
Is it Subscribed?	--	--	Yes	<i>No</i>	Yes
Trying to Access subscribed benefits	--	--	Yes	Yes	<i>No</i>

Actions					
Continue Browsing	--	Yes	Yes	--	Yes
Redirect to Login Page	Yes	--	--	--	--
Redirect to Subscription Page	--	--	<i>No</i>	Yes	No
Continue without plan benefits	--	--	<i>No</i>	--	--

3.2 User Authentication

Conditions	1	2	3	4
New User?	Yes	Yes	No	No
Valid Details?	Yes	No	-	-
Valid Credentials?	-	-	Yes	No
Actions	1	2	3	4
Sign Up	Execute	-	-	-
Enter Details	Execute	-	-	-
Successful Registration	<i>Execute</i>	- - -	- - -	- - -
Error: Redirect to Sign up	- - -	<i>Execute</i>	- - -	- - -
Sign In	- - -	- - -	<i>Execute</i>	-
Enter Credentials	-		-	
Redirect to home page	-		-	

Algebraic Specification

Types Section

User Related:

type AuthenticationStatus = {Success, Failure}
type Authentication = {Email, Password}
type RegisterStatus = {Success, Failure}
type Registration = {Name, DateOfBirth, Email, Password}
type ProfileInformation = [Avatar, Personal Info, Plans, Privacy Terms]
type SubscriptionStatus = {Success, Failure}
type SubscriptionPlans = {Basic, Standard, Premium}
type User = {UserId} -- UserType can be { Guest, Registered Only, or SubscribedUser}
type UserCapabilities = {Browsing only, [Browsing, Trailers, Related Clips], [Actions Under Subscription Benefit]}

Features Related:

type RecommendationList = [content list]
type SearchResult = [Content list]
type ContentCatalogue = {Popular, Top Rated, Upcoming, Trending}
type Content = [Movies, Tv Shows]
type Benefits = [Liked Content, Watch History, Favourites, Watchlist]

Exceptions Section

exception UserAuthenticationException - Invalid Credentials.
exception RegisterException - User with same Credentials exists.
exception SubscriptionManagementException - Trying to access subscribed content without subscription.

Signature Section

User Related:

Authentication: (Email, Password) -> Authenticate.
[where Authenticate is a function that authenticate and then returns AuthenticationStatus]
[raises UserAuthenticationException if AuthenticationStatus is False]

Registration: (Name, DateOfBirth, Email, Password) -> Register.
[where Register is a function that register and then returns RegistrationStatus]
[raises RegistrationException if RegistrationStatus is False]

UserProfile: (User) -> ProfileInformation.
UserAccessPermissions: (User) -> (UserCapabilities)

SubscriptionManagement: (User, Action) -> SubscriptionStatus

Features Related:

LikedContent: () -> LikedContentList.

WatchHistory: () -> WatchHistoryList.

Operations:

(content) -> Clear Watch History.

WatchList: () -> WatchList.

Favourites: () -> FavouritesList.

ContentCatalogue: () -> ContentCatalogue.

PersonalisedRecommendations: (User) -> RecommendationList.

SearchAndFilter: (Query, Filters) -> SearchResult.

Content: () -> content.

Operations:

(content) -> Add To LikedContentList

(content) -> Add To WatchList.

(content) -> Remove from Watchlist.

(content) -> Add To FavouritesList.

Rewrite Rules

Content(!AuthenticationStatus)-> **Authenticate.**

AnyFeature(!AuthenticationStatus)-> **Authenticate.**

(AddToWatchlist | RemoveWatchlist)(Watchlist(AuthenticationStatus))-> **Watchlist.**

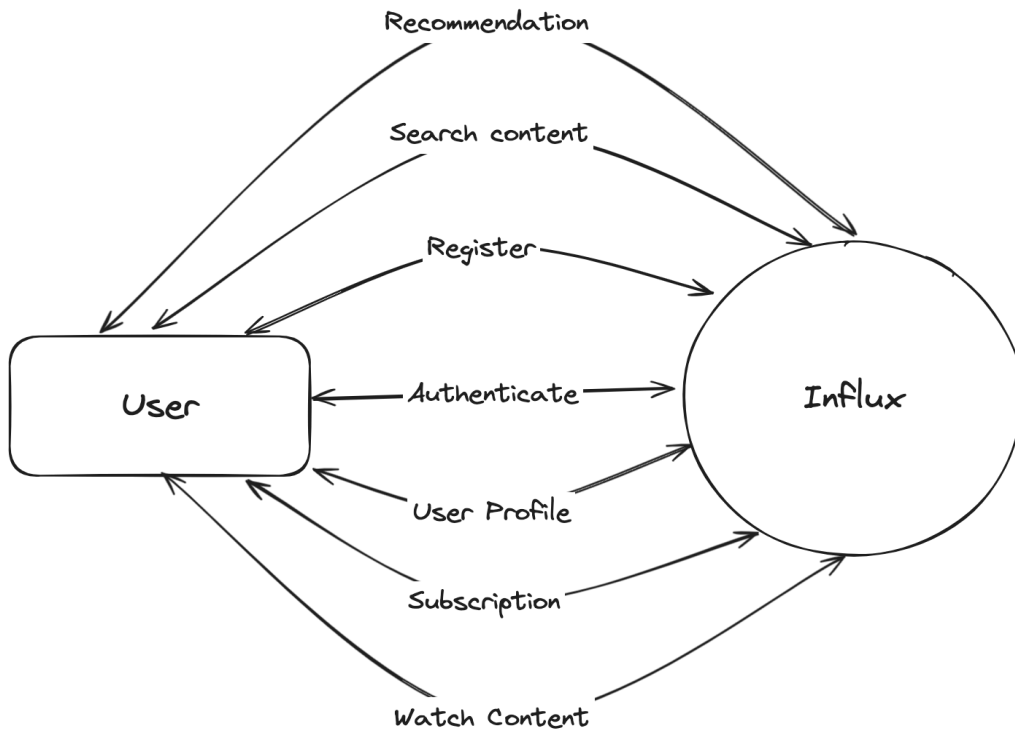

Clear(History(AuthenticationStatus))->**WatchHistory.**

SubscribedBenefits(userBenefit!=UserCapabilities[3])->exception

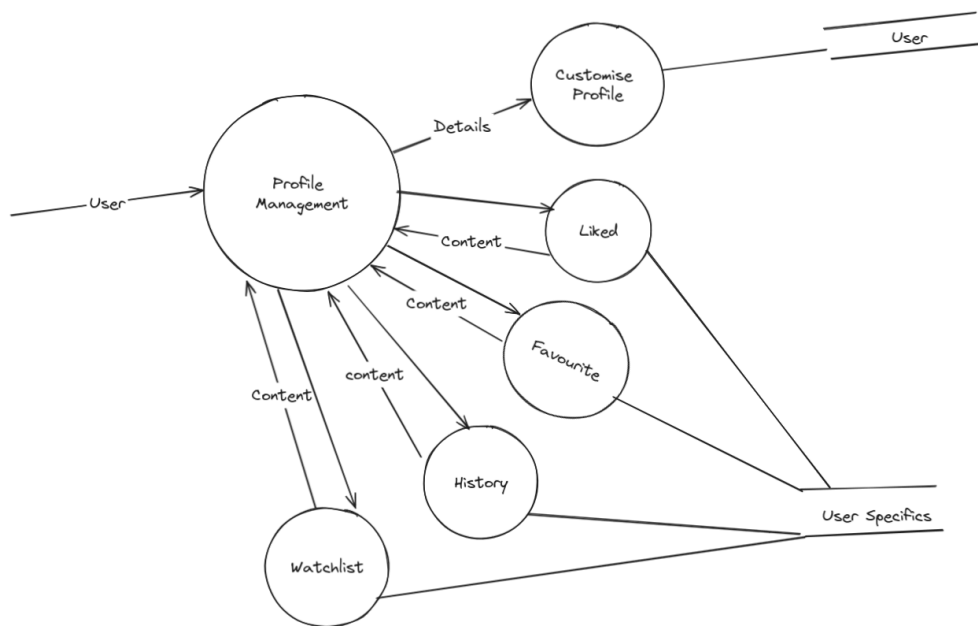

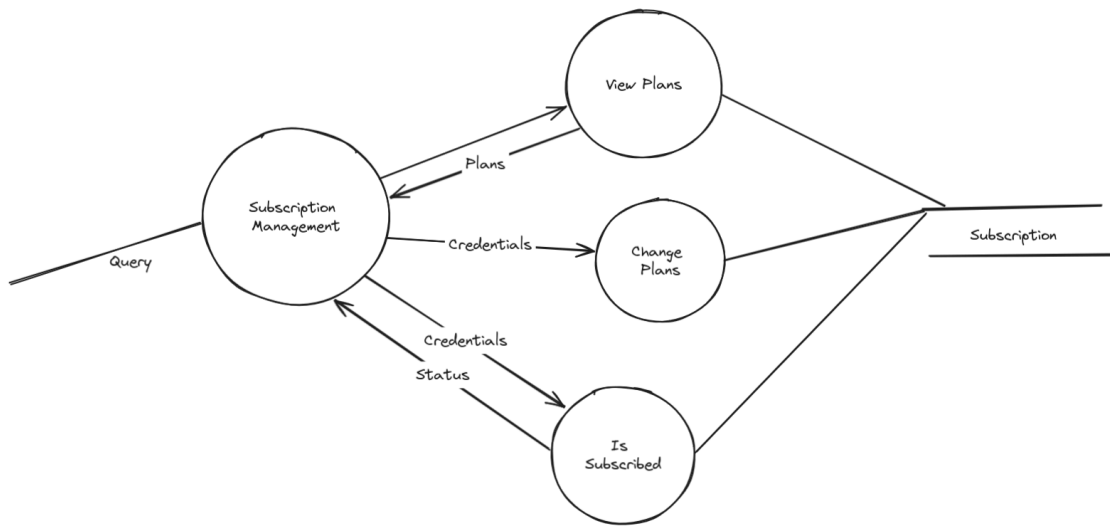

SubscriptionManagementException
